

# ADDITIVES INC.

## Cleaning Products

Additives Inc. cleaning products are based on an effective proprietary mixture of non-hazardous surfactants. They have a low level of aggressiveness to human skin, contain no excess caustics or acids, contain no solvents or VOC's and are not subject to regulation by the DOT, EPA, SARA or CERCLA. The cleaners will not harm most plastics, fabrics or glass, and our General Purpose Cleaner will not dull most paints nor darken aluminum. Although these products are relatively friendly to people, materials of construction and the environment, they are tough on dirt. Their superior effectiveness as cleaners is due in large part to their impressive versatility, and will remove both oil-soluble and water soluble soils, including organic and inorganic matter, oil, grease, grime, soot and exhaust stains, road film and more.

## Rail Man's Hand Cleaner Benefits

- ◆ Extra Heavy Duty Cleaner
- ◆ Biodegradable
- ◆ pH Neutral
- ◆ Anti-bacterial
- ◆ No hazardous ingredients

## Rail Man's Hand Cleaner

### Product Description and Applications

Rail Man's Hand Cleaner removes grease, oil, asphalt, tar and adhesives like a solvent, but contains no solvents or hazardous ingredients of any kind. Its fast-acting formula is tough on dirt but gentle on hands. Rail Man's Hand Cleaner is pH-neutral and contains a humectant to condition and prevent skin from drying. It also contains a bacteriostat to combat infection and dermatitis. Rail Man's Hand Cleaner works well with hard or soft water, and has a pleasant citrus fragrance. Oil, grease, grime, tar, ink, paint, carbon putty and mastic come off easily with Rail Man's Hand Cleaner.

### Product Specifications

<b>Biodegradable</b>	Yes
<b>Color</b>	White gel
<b>pH</b>	7-8
<b>Odor</b>	Citrus fragrance
<b>Solubility in Water</b>	Complete
<b>% Volatile Organic Compounds</b>	None
